

Zowe 3Q 2023 PI Planning

TSC Focus

Presenters:
Jakub Balhar

Mission

- Simplify the usage of the zOS
- Reduce the learning curve for zOS
- Attract new people to zOS
- Build great community

Meaning of life

Themes

Installation and Configuration Experience

- Work continues.
- Delivered
 - Improved documentation on certificates
 - Certain improvements in logging
- Server Side
 - Certificate management
 - Improved logging
 - Better automation

Fighting the installation

Security - continues from previous PI

- Open SSF recommendations
- Supply Chain Security improvements

Waiting Danger

Feedback

- Deeper integration with the users
 - Publish better information on the System Demos
 - Invite the users to the PI Planning
 - Improve usage of zowe mailing lists
 - Better present the results of question of the month

Not enough feedback

Policies

Assets - continued

- What types we have?
- How do we want to store them?
- How do we collaborate?

Our assets

Testing - continued

- Unit testing
- Functional Testing
- Acceptance Testing
- Penetration Testing
- Codify Best Practices

Careful, you get burned otherwise

Plans

Version 3

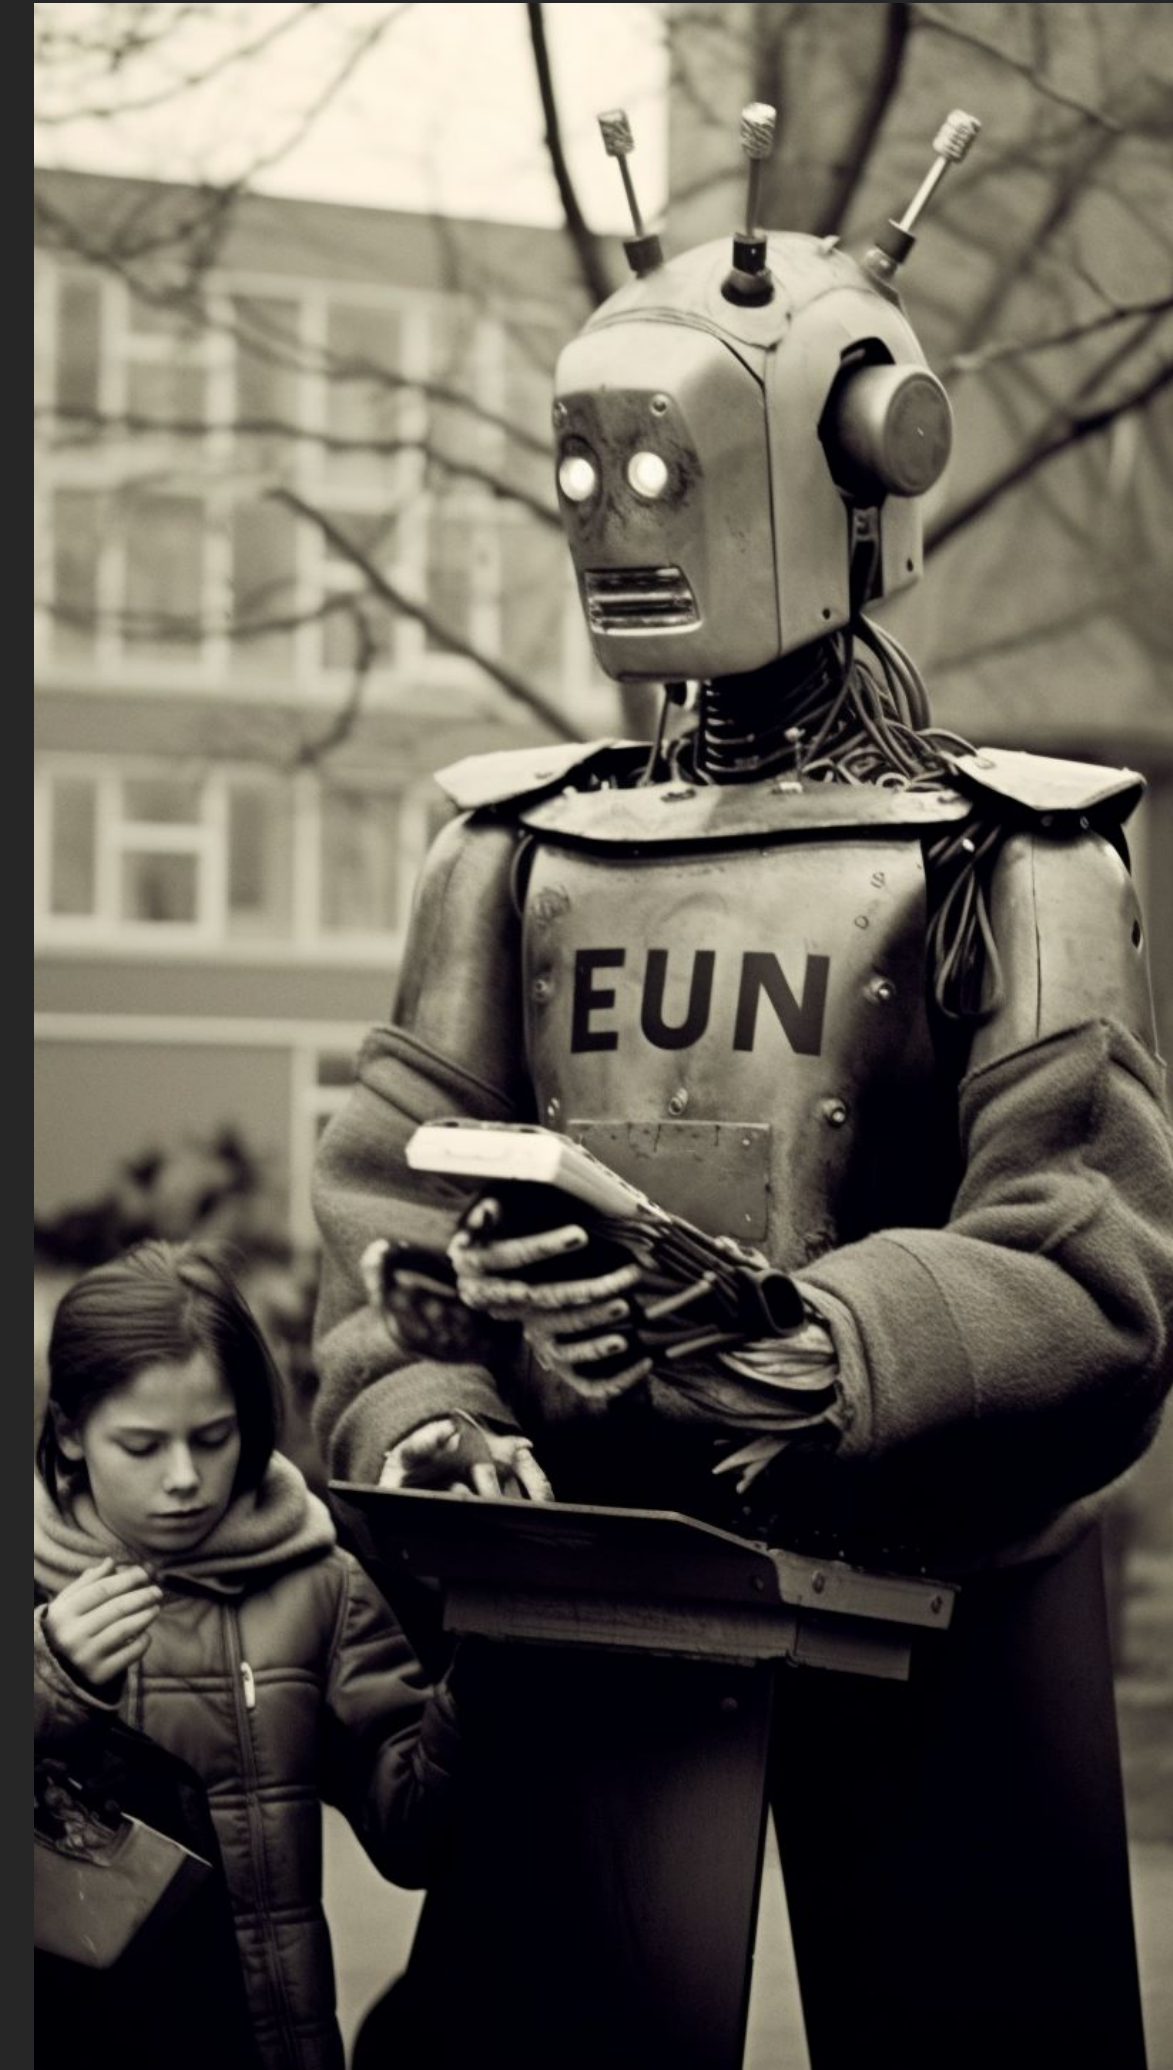

- Updates to the Conformance program
- Preview release for extenders
- Office hours for extenders and users.

Third book in series

Education and certification

- Cooperation with Interskill

|Let's learn

Security

- Continue with the Core Infrastructure Initiative requests

I will secure your code!

Technical Testing

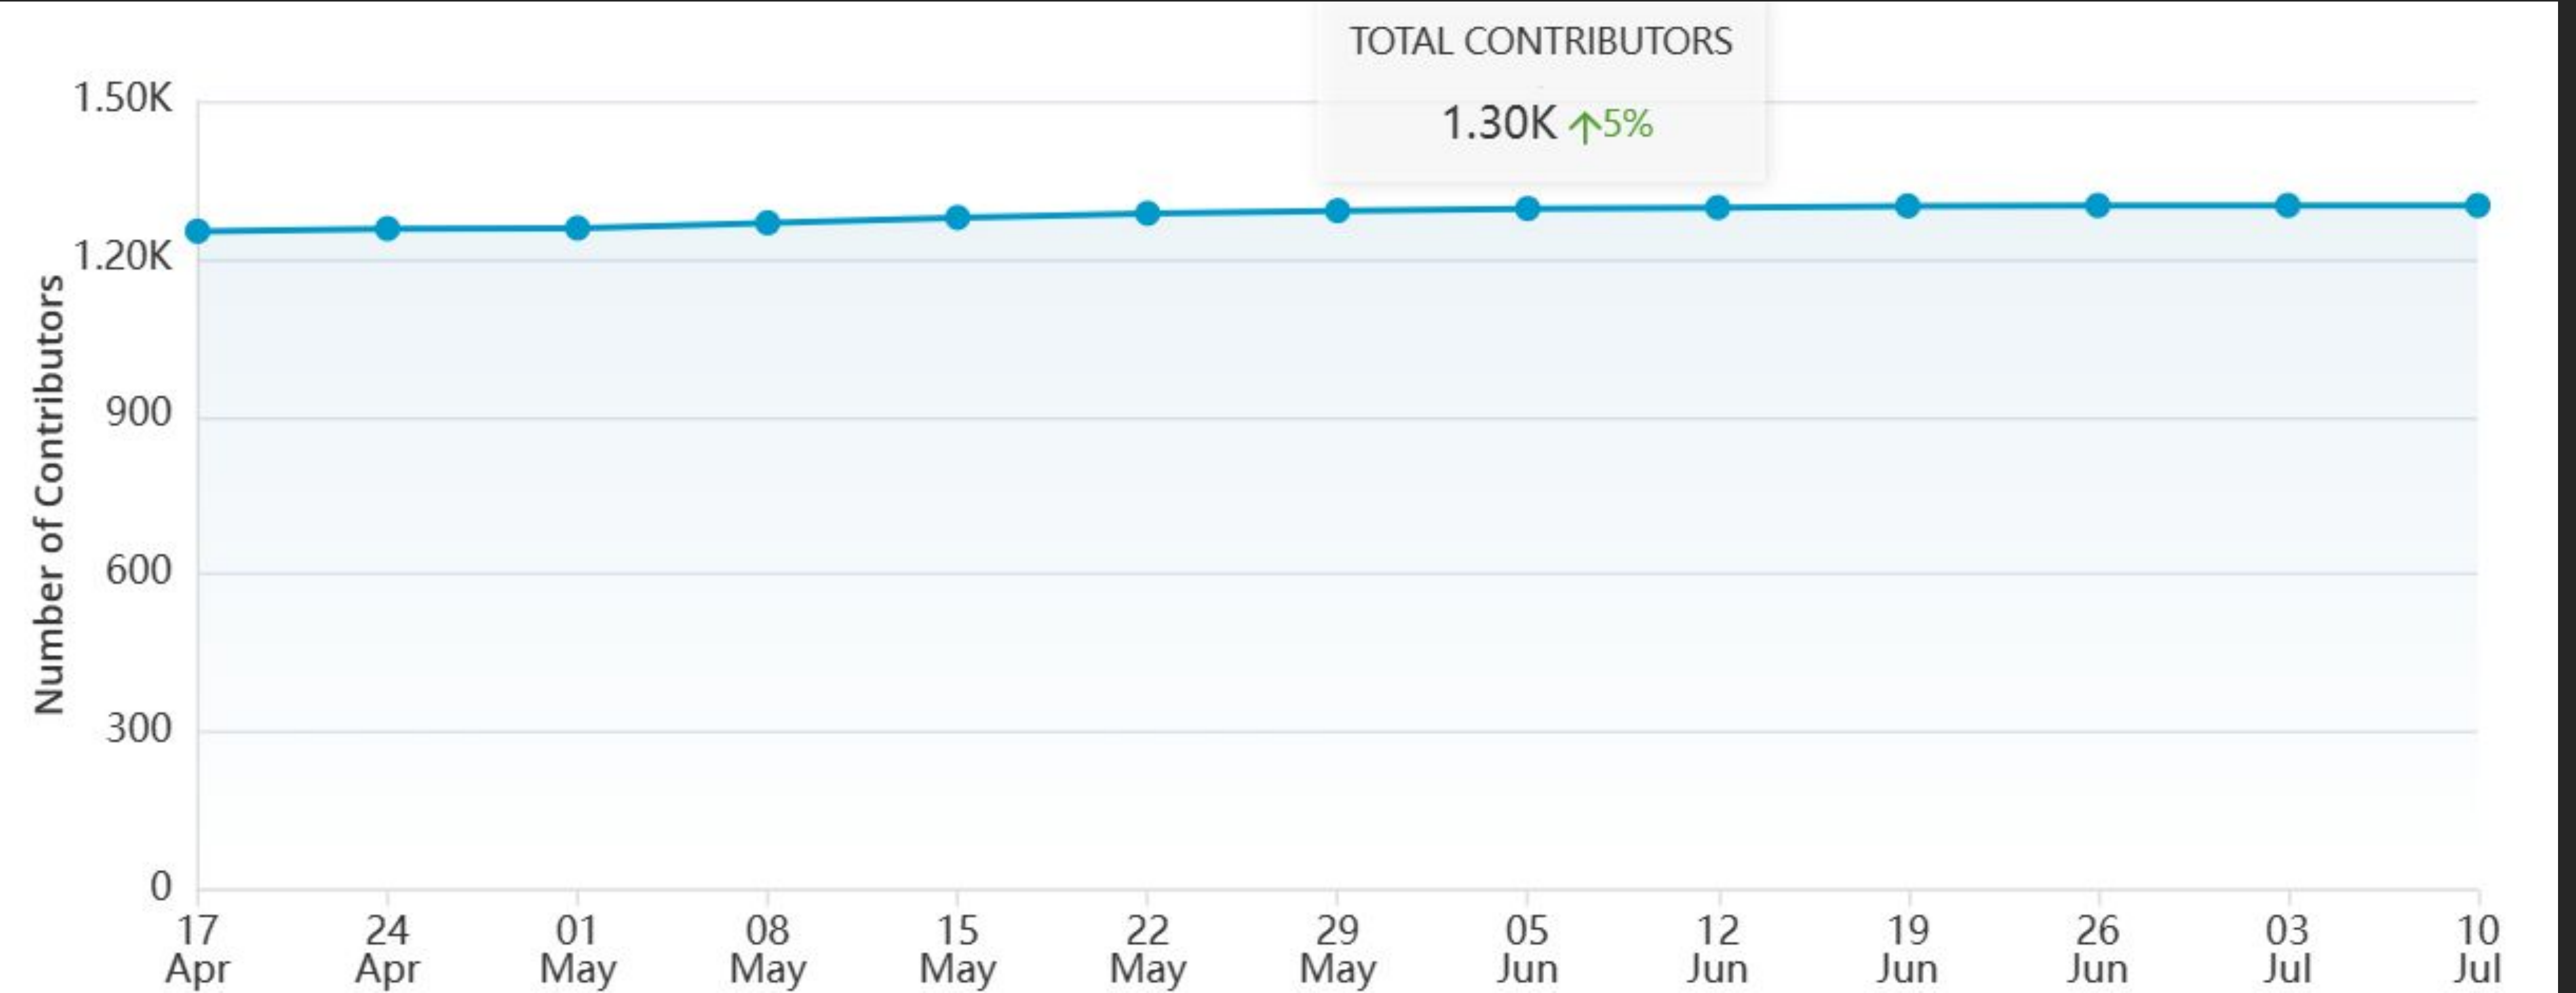

- When do we claim support for specific Node, Java, zOS?
- We need to codify the information and make sure they are visible.

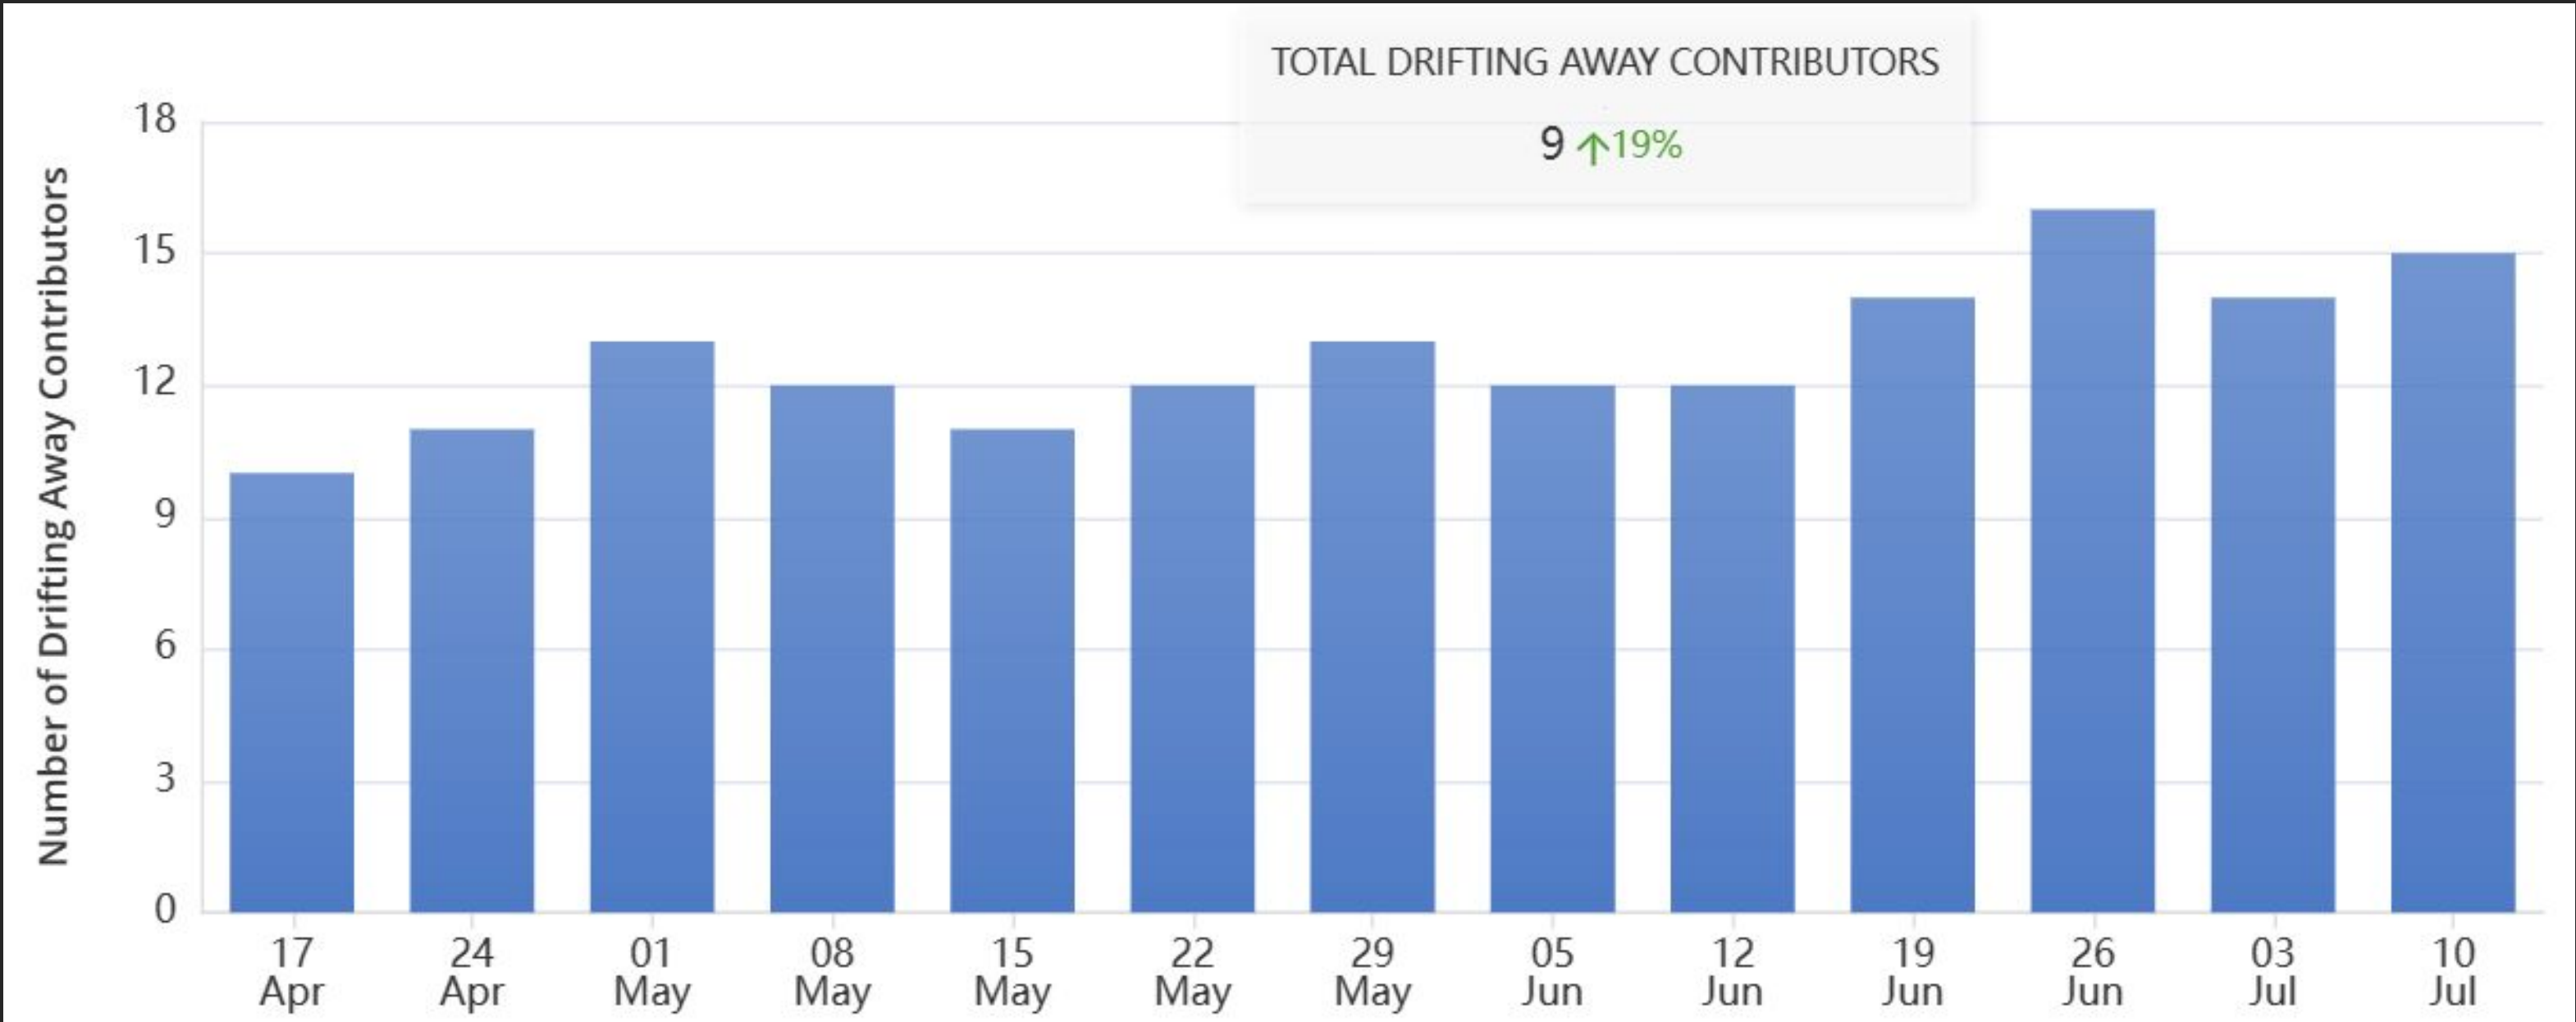

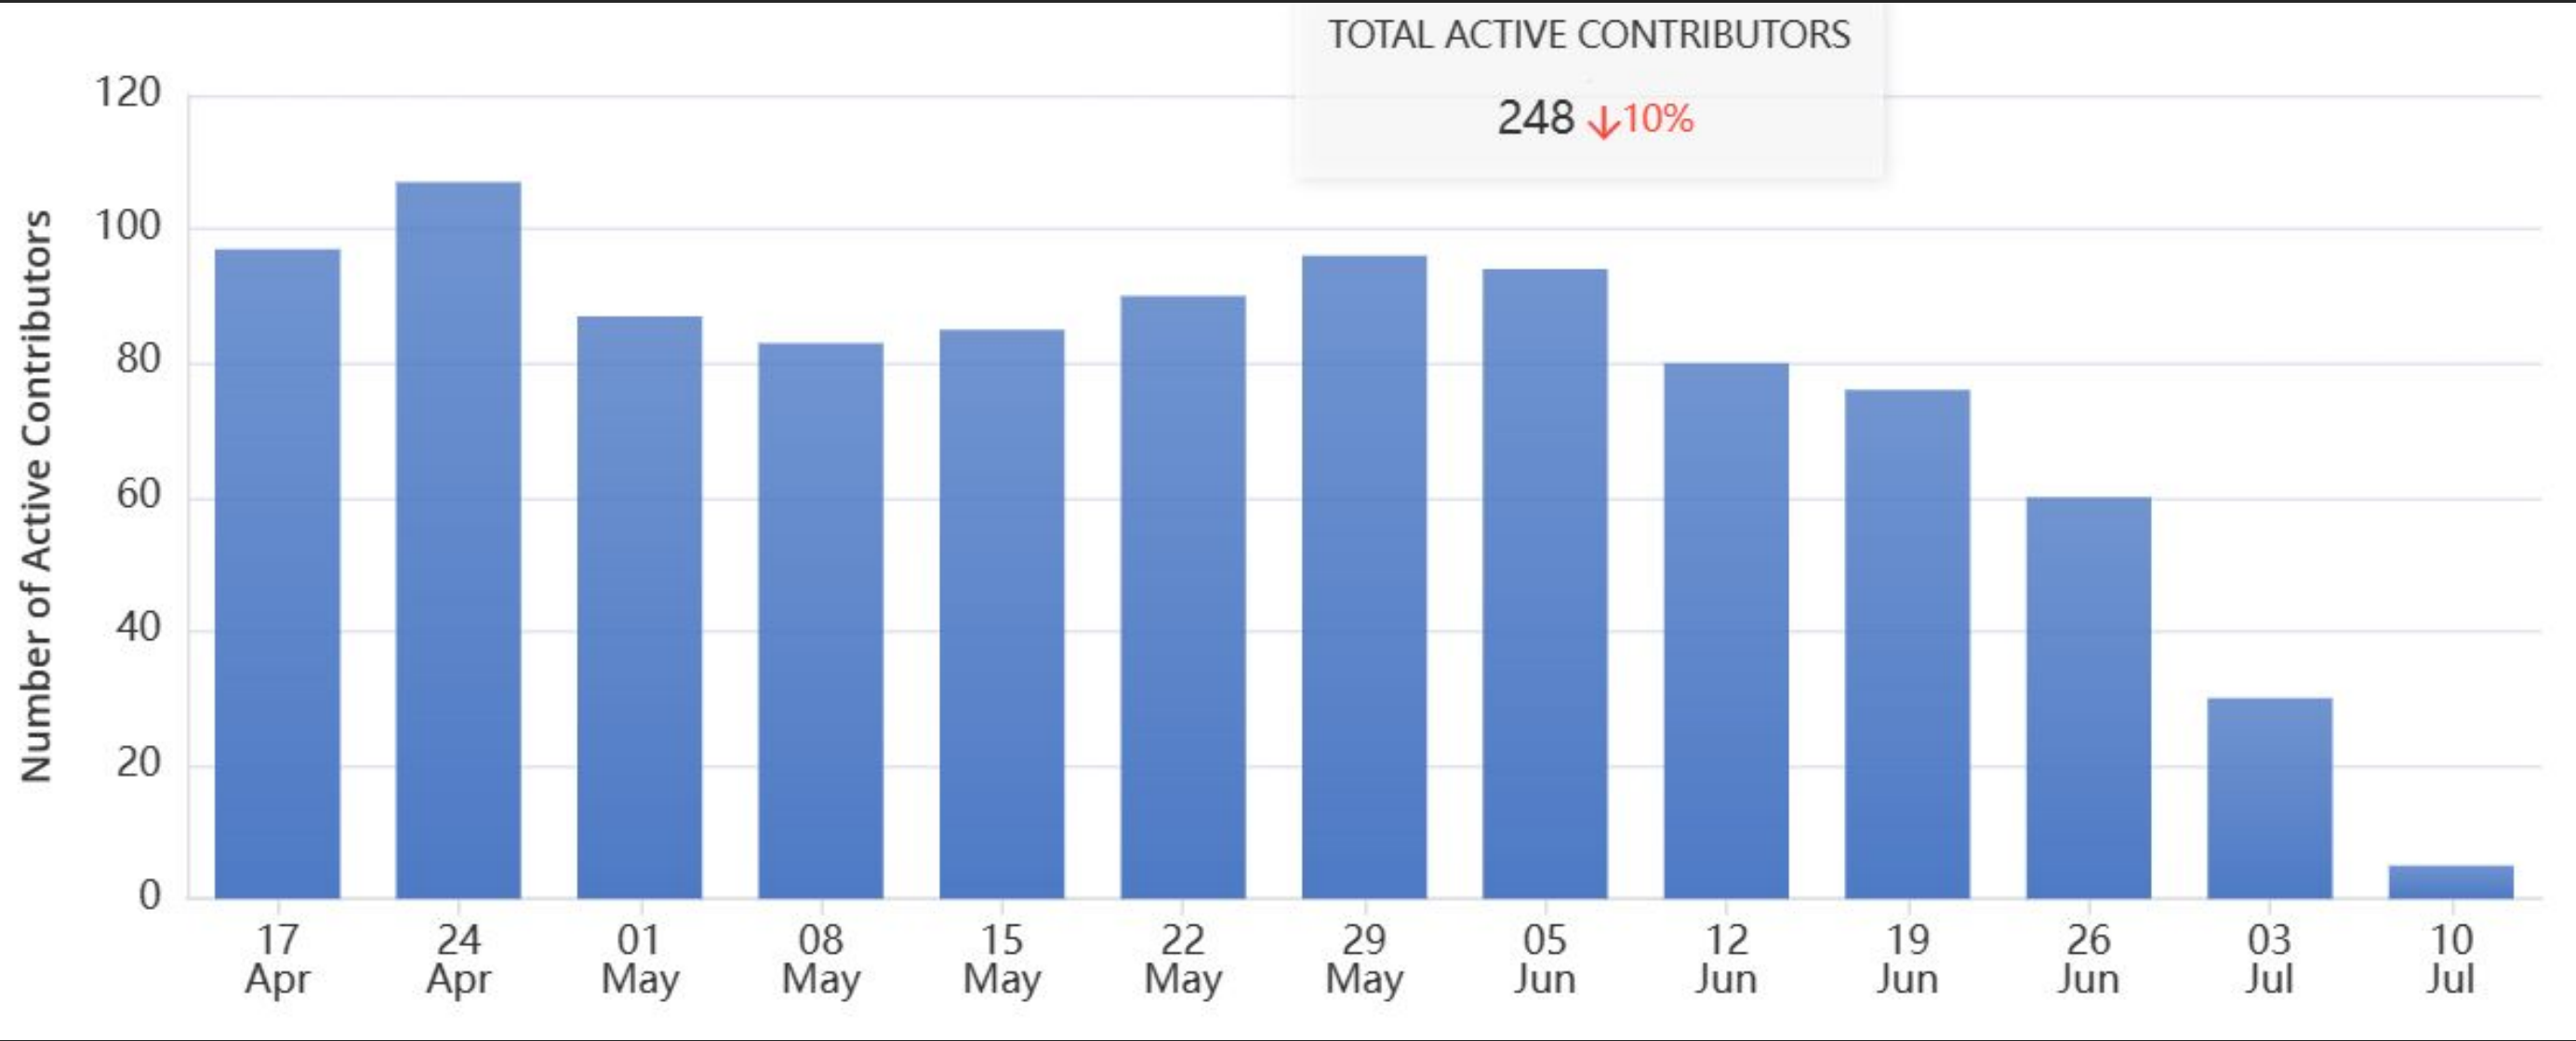

It won't work without these
